DETAILED ACTION

1. As per Board of Patent Appeals and Interferences' Decision on Appeal 2008-005226 dated 01/11/2010, claim 1-8 rejections are reversed. Further examination has determined that claims 1-9, 11-20 and 22-23 are to be allowed.
2. Amendment received on 12/08/2005 was entered. No claim change was made.
3. An amendment was previously received on 03/30/2005. Claims 1, 11, 13 and 22 were amended. Claims 10 and 21 were cancelled. Claims 1-9, 11-20 and 22-23 were pending and examined. A Final Rejection was issued on 06/08/2005 and withdrawn with a Non-Final Rejection issued on 08/08/2005.

Priority

4. This application has no priority claim made. The filing date is 08/23/2001.

Reasons for Allowance

5. Claims 1-9, 11-20 and 22-23 are allowed as amendment received on 05/09/2006.

The following is an examiner's statement of reasons for allowance:

The closest prior arts of record issued to Genty et al (2002/0178361), Vandergeest et al (2002/0169988) and Pai et al. (US 6711138 B1) together fail to teach or suggest "a computer implemented method for establishing a Virtual Private Network (VPN) communication tunnel between a client computer and a server-side system, comprising: receiving a request to establish a VPN session with a server-side system from at least one client computer out of a plurality of client computers coupled to a modem within a client-side system, where said request contains login details for a user of said at least one client computer, determining a network address of said at least one client computer; authenticating said user based on said user login details; establishing a VPN tunnel between said at least one client computer having said network address and said server-side system, where said VPN tunnel is established over said modem; receiving a new request to establish a new VPN session with a different server- side system from a different client computer out of said plurality of client computers coupled to said modem within said client-side system, where said request contains new login details for a new user of said different client computer; determining a new network address of said different client computer; authenticating said new user based on said new user login details; and establishing a new VPN tunnel between said different client computer having said new network address and said new server-side system, where said VPN tunnel is established over said modem" in combination with all the elements of each independent claim as argued by Applicant [See item A in section VII of Argument as per appellant's Appeal Brief Filed on 06/19/2007]. Applicant argues that Gentry is

silent as to establish two separate connections from two separate computers from the same client side system (see 2nd paragraph on page 9 of Appeal Brief Filed). This argument is considered persuasive as Analysis in Patent Appeals and Interferences' Decision on Appeal 2008-005226 dated 01/11/2010.

The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
